

Political introduction to the Slow Food **Education Manifesto**

Well aware that education and training of the next generations can no longer be provided entirely by institutions, we believe that we must offer a more broad-reaching educational approach, also involving other players active in the field in a cooperative manner.

Education is individual and collective responsibility that belongs to all but must be close to each of us. It should be adopted and applied in schools and in politics, associations, cooperatives, cultural centers, families and any other possible contexts.

It is important to recover and foster the role of the community, to ensure the passing on of all knowledge tied to material and social culture, including the culture of food.

We believe that food is the ideal instrument with which to experiment and promote an articulated, complex and creative education that gives value to interdependence, the environment and common good.

Slow Food upholds that everyone has a right to education, without distinction by sex, language, ethnicity or religion. Education should be available in various locations and at any age, in order that we don't pass on to the next generation that which we can help improve today. It is only through an educated, critical and motivated population that countries can give the best of themselves.

The right to education cannot remain an abstract declaration, as the principles are violated when they are not active.
